

# Easy Answers About Instant Orthodontics

## What are Instant Orthodontics?

Instant orthodontics is a cosmetic dentistry procedure that uses porcelain veneers and crowns to create a straight, even, smile without braces. Instant orthodontics offer an ideal solution for adults with crooked and uneven teeth, especially those who may be hesitant to wear traditional braces. In addition to correcting alignment, porcelain veneers can correct the color, texture, shape, and overall appearance of the teeth.

## What are porcelain veneers?

Porcelain veneers are a thin layer of porcelain that is bonded to the front surface of your teeth to create a more aesthetically pleasing smile.

## How long does the process take?

While straightening teeth with braces can take years, Instant orthodontics using porcelain veneers will give you a straight, beautiful smile in about two visits.

## Are Instant Orthodontics durable?

Very. If treated properly, they can last forever.

## Where are they made?

Most dentists have their porcelain veneers fabricated by an outside dental laboratory. While they wait for them to be made (several days or even weeks), they will place temporary veneers on their patient's teeth.

At Gateway Dental Arts we have our own in-house lab and ceramist. Your veneers are made on location so that we can insure a perfect match in color and fit. Eric Newell, our ceramist, has won numerous awards for his work.

## How much do instant orthodontics cost?

The cost will depend on the number of veneers and crowns you will need placed. We do offer a free consultation, at which time the extent of the needed work, as well as the cost to complete the work, will be explained, helping you in your decision.

## Do you offer financing?

Yes. We offer a range of financing options for our patients, including affordable payment plans with zero interest. We do offer several financing options that can be discussed as well.

**You deserve a natural, beautiful smile.**
